Christian Science Services

At Odd Fellows' Hall every Sunday morning at 11 o'clock. Subject for Nov. 10.—Adam and the Fallen Man. Sunday School at 12:15. The public is cordially invited.

The tennis tournament last Friday afternoon on the High School courts resulted in a victory for Los Gatos, that team winning 2 to 1.

Rev. J. F. Wilson who has been supporting several Job's comforters on his hand is able to be about again with a degree of comfort and will conduct services Sunday morning as usual.

Just received a shipment of Gun Metal Button Shoes for growing girls. Prices \$2.25, \$2.50, \$2.75 and \$3.00. It will be to your interest to see this line of Shoes. The Campbell Shoe Store.

E. E. Lanphear, who underwent two serious operations a few weeks ago at St. Louis, will be home the first of the week. His many friends will congratulate him upon his rapid recovery.

There will be a meeting of the principals of Grammar Schools, tomorrow, Nov. 9, at the office of the County Superintendent at 10:30 a. m. This includes schools of one teacher or more.

Grandpa Brown of south second street has been confined to his bed for four days. Dr. Miller of San Jose was called and found him suffering from a complication of troubles due to old age.

An especially interesting Epworth League meeting will be held here Sunday evening. B. K. Kerr will speak in the interests of the reorganization of the County League. A full attendance is desired.

Mr. and Mrs. Wm. H. Motley, who came recently from Portland, Maine, have taken rooms at Mrs. M. J. Wilson's, as they intend remaining here for some time to enjoy the benefits of our fine climate.

N. A. Blake has purchased a lot on Fourth street in the Strom subdivision and has been getting ready for the wet season when he will dig out several of the prune trees and set in walnuts and other kinds of fruit.

A number of enthusiasts went to San Jose Tuesday evening to get the election returns. In the real estate office of Chas. White many of those who could not go in were given returns here by a private wire from town.

The Misses Della Jannerich of Brighton, Colo., and Miss Emma Troger of Iowa, who are taking a year's vacation traveling thru the west, were guests of Mrs. E. Hancock, last week, leaving Sunday for Los Angeles.

Union services will be held at the Congregational church Sunday evening. Mr. D. M. Grandier, who so ardently labored in securing the passage of the local option law at last legislative session will discuss the work of the closing of the saloons in the state.

Rev. and Mrs. G. E. Atkinson returned Tuesday from Redwood City where they attended the 50th anniversary of the organization of the Congregational Church. Seventy-six new members joined the church at this time. Wednesday Mr. Atkinson went to Santa Cruz but will return for the services Sunday.

Miss Nellie J. Arnot arrived Monday to spend a year with her parents, Mr. and Mrs. P. Arnot of Sunnyside. Miss Arnot landed in Boston on the 22nd of August, after spending seven years in missionary work in west central Africa. She was sent by the Missionary Association on an investigating trip regarding missionary conditions in the Zulu country. Since reaching the United States, Miss Arnot has been lecturing on Cong'l Foreign Missions.

State Meeting of Farmers' Union

The California Division of the Farmers' Educational and Co-operative Union of America will be held in San Jose on the 12th and 13th inst. The meetings will be in the Labor Temple Hall on north third street.

There will be an open session during the forenoon of the first day—the 12th inst. devoted to addresses of welcome etc. All the other sessions will only be open to members.

At 1 o'clock on the 13th inst. a banquet will be given by the members of Santa Clara Valley. The Lady Members are requested to bring well-filled baskets, and the Male Members to give 10 cents each.

The writer believes that it may be fruitfully said that this is the only business organization in the world that has chosen the Golden Rule as its fundamental basic principle on which to do business. On no other basis CAN all parties satisfactorily conduct business with each other therefore it is unquestionably the right method and consequently the only right one. All others are right to the extent they conform to this one. This is righteousness in hard-ness not on dress parade.

The National President, Charles Barrett, may be present and a class of candidates will be initiated by the Pioneer Drill Team.

All members are urged to be present.

Santa Clara Is a Rich Valley

This Year's Crops Exceed All Those of Former Years in This Valley

The statement made in The Morning Times of the amount of dried fruit shipped East thus far from Santa Clara valley was a most astonishing piece of news.

But now comes the estimates of the amount of deciduous fruits of the entire state, as ascertained by Assistant Manager E. W. Jones of the California Fruit Distributors and the showing is most satisfactory.

It was thought at first that the big shortage of the Tokay grapes available for the eastern market would greatly reduce the number of cars which California could muster, but the other fruits were a surprise to even the pessimists and the 1912 output is easily a record-breaker.

This much could have been said of the crop last year, as it stood far to the front of all its predecessors, particularly the grape crop; but grapes were short this year and it was reserved to the pears to make up for all the loss and even add to the surplus.

Taking everything into consideration, the fresh deciduous fruit shipments this season have already passed the entire output of 1911. To date the fruit shipping concerns have handled 12,563 cars against a total of 12,539 cars for last season.

Cherries and plums assisted pears in making the 1912 deciduous crop a record-breaker, but pears were most prominent with 3,101 cars this year to date against 2,302 cars for all of last season. This year 244 cars of cherries were shipped against 216 cars last year and 1,775 cars of plums were shipped this season against 1,366 last.

Grape shipments this season are not so far behind those of a year ago as the damage to Tokay warrants. The reason is that the raisin market has not been the best and many Malaga grapes have been shipped fresh instead of going to the drying yards.

Generally considered, prices this year have been satisfactory. Comparison of shipments:

	October, 1911	1912
Cherries	216 1/4	244 1/4
Apricots	223 1/2	195 1/2
Peaches	2,021 1/4	1,621 1/4
Plums	1,366	1,775 1/2
Pears	2,292 1/4	3,084 1/4
Grapes	4,548 1/2	5,089 1/2

Total 10,683 12,025 1/2
When the final record has been made up, there is no doubt that the Santa Clara valley will be the mater of the many, and will stand well to the front in many lines.

And when the totals have been found when the pears and the apples and nuts have been heard from, the amount of cars will please and astonish and the millions to be added to the wealth of this favored valley will turn the eyes of the entire state in this direction.

Naturally these figures are a source of pride and satisfaction to the residents of the valley, but they are at the same time one of the most forceful advertisements which could be sent forth.

Surprise in Store

The Methodist Sunday School is giving a surprise each Sunday to all who are in school at ten minutes before ten o'clock. Last Sunday the Superintendent brought for the inspection of the school a pair of Dutch Clogs which came from Holland. Clogs like these are made of one piece of wood, being home made in many cases, and worn by nearly all the people of that country.

Mr. H. Schmackenberg's class held the class banner last Sunday. Miss Lewis' class of young men is now picking up and in a few weeks it is thought that the class will have at least a dozen members. It may depend on your coming. If so let us see you on the 10th. Come and see the surprise. It may be a war relic.
J. C. G.

Home and School Club

The Home and School Club met at the Grammar School Wednesday afternoon. Prof. D. R. Wood of the San Jose State Normal School was the speaker of the afternoon. He gave a most interesting, instructive talk on The Educational Value of Nature Study.

Miss Billiou gave a stirring recitation. The committee on Child Study, Mrs. Billiou, chairman, will entertain the club at the next meeting, Nov. 19, 1912.

Mrs. Ann Hancock of Denver, Colo., is expected Sunday and will make her home with her son, E. Hancock of Harrison ave.

Election Returns

Altho the greatest interest for years centered in the election of Tuesday, the day passed very quietly and orderly throughout the country.

The local polls were in charge of the following officers: Clerks, Mrs. Lottie Miracle, S. R. Wade; Inspectors, T. E. Reynolds, Mrs. Leona S. Billiou; Judges, Mrs. Sarah E. Alexander, Geo. Whitney.

The vote in Campbell precinct was as follows:

President.	
Progressive	97
Democrat	86
Socialist	93
Prohibition	27

Congress.	
Hayes	118
Holohan	49
Whitaker	114

State Senate.	
Benson	142
Edgar	36
Dunham	89

Assembly.	
Bohnett	171
Hines	30
Lambert	77

The Race Track Amendment was snowed under 220 to 14.
The returns from Santa Clara Co. were.

President.	
Roosevelt (Prog.)	10,828; Wilson (Dem.) 9567; Debs (Soc.) 1888; Chafin (Proh.) 803; Taft (Rep.) 265. Plurality for Roosevelt electors 1261.

Congress, Eighth District.
E. A. Hayes (Rep.), incumbent, 11,782; J. B. Holohan (Dem.) 6723; Robert Whitaker (Soc.) 3113. Plurality for Hayes over Holohan 5059. Majority for Hayes 2146.

State Senate, 27th District.
Frank H. Benson (Rep.) 6356; William Edgar (Dem.) 3740; Dunham (Soc.) 1459. Plurality for Benson over Edgar 2616. Majority for Benson 1157.

Assembly, 44th District.

L. D. Bohnett (Rep.), incumbent, 5,926; Will M. Hines (Dem.) 4051; Lambert (Soc.) 1271. Plurality for Bohnett over Hines 1875. Majority for Bohnett 604.

There will be a concert in the Methodist church Tuesday evening, Nov. 12, at 8 o'clock. The program will be given by Miss Maude Hawley, Reader. Mr. Warren French, Baritone. Mrs. Grace Townner, Pianist. Admission, 25 cents.

MacPherson's Testimony.
The MacPherson—Man, Judkins is right—there's a deal of sufferin' attendant on you whusky drinkin', for, MacTaggart, ye'll mind me, whiles a mon's drinkin' his ain whusky there's the terrible expense tae think of, an' whiles he's drinkin' a friend's whusky he drinks sae much that he suffers terrible the mornin'.—London M. A. P.

MOTHER'S SHARE OF SALARY

Youth Illustrates Absolute Necessity for Her Services, But No Money Value on Work.

A man chanced to meet a certain boy who was unduly proud of the fact that he was earning regular wages and supporting himself. He entered into a conversation with the boy, which ran something like this: "Yes," said the boy, "I make \$3 a week; Mary is in the store and she earns \$5; I don't know how much father earns; and Ted and Jim, they don't earn anything—they just go to school."

"And do you board at home?" asked the man.

"Oh, yes; we eat breakfast and supper there, and mother puts up our dinners for us."

"Yes, I see; who gets the breakfast and does the cooking?"

"Mother."

"Who washes for you?"

"She does."

"Do you keep a girl?"

"No, we don't need one. Besides, we couldn't afford one, anyhow."

"Does your mother do all the work for the whole family?"

"Why, yes, of course."

"Does she sew and mend for all of you, too?"

"Why, I should say she did. We never hire help for anything."

"You say you get \$3 every week and Mary \$5. What does your mother get?"

"Mother! Why she don't work; she just stays at home; she don't get anything."

The mother's services were evidently necessary, but no money value was placed upon her work. It was taken as a matter of course that she should be a cook, nurse, sew and be a regular Jack of all trades and good at all. The woman has a great, God-given responsibility, when the health of a family is placed in her hands.

KEEP BIRDS FROM RECORDER

Instrument Used on Isle of Wight to Measure Duration of Sun Obscured by Flocks of Crows.

The United Kingdom enjoys so comparatively few sunny days that every hour of sunshine during the year is cherished. A sunshine recorder is maintained on the Isle of Wight.

To Keep Crows Away.

which is one of the sunniest places in the British Isles, but it appears that the crows have been interfering with it, says the Pathfinder. They gather about it in such flocks and use it for a perch so much that they shade the sensitive instruments and thus make them register cloudy weather when it is really sunny. So a scarecrow has been erected to keep them away, and it is reported to be a success.

Too Many Places.

"What's the matter?" asked the policeman, "haven't you any place to go?" "Any place to go?" repeated Tired Timothy, with supreme contempt. "You chump, I've got the whole United States and a big part of Canada before me. I've got so many places to go that it's worryin' me dizzy to make up my mind which way to start. Lemme alone a couple weeks till I kin git a line on what it's best to do."

ROSE ABOVE HANDICAP

POSTHUMOUS CHILDREN WHOSE NAMES ARE FAMOUS.

Birth of Child of John Jacob Astor Has Aroused Interest in the List, Which Contains Many Persons of Note.

The birth of a posthumous child of John Jacob Astor arouses especial interest and sympathy because of the tragic death of the father in the Titanic disaster. Yet all posthumous children excite such sentiments. Some of these children have moreover attracted additional attention from the world in after life through their own achievements.

Alexander the Great has been said by some historians to have been born after the death of his father, but according to other authorities Philip of Macedon lived to enjoy the companionship of his son for several years. It may be that Alexander's stepbrother was a posthumous child, but that has not been proved.

Ben Jonson, the Elizabethan dramatist, was born in 1573, a month after his father's death. He was fortunate in acquiring a stepfather who was a good friend to him and gave him an excellent education.

Thomas Herbert was of posthumous birth, says his elder brother, Lord Herbert of Cherbury. He is remembered chiefly as the brother of Lord Herbert of Cherbury and of George Herbert, the poet.

Early in the seventeenth century another child came into the world under similar conditions. This was Abraham Cowley, the English poet. His father, who had been a grocer in humble circumstances, died shortly before the birth of the son. Thanks to the unflinching struggle and devotion of his mother the boy received a good education and his poetic genius had opportunity for development.

Dean Swift was born a few months after his father's death. Kindly disposed relatives helped his mother with his upbringing and education.

Adam Smith, author of "The Wealth of Nations," put in his appearance in this world some four months after the death of his father.

Still another English poet was a posthumous child. This was Thomas Chatterton, who was born in Bristol about the middle of the eighteenth century.

Andrew Jackson, seventh president of the United States, was born in a little log cabin on the border line between North and South Carolina. In that same cabin his father, who had come to America from the north coast of Ireland, died a few days before the birth of his son.

Rutherford Birchard Hayes, the nineteenth president, was another posthumous child. He was born in October and his father died in the July preceding.

The present king of Spain, Alfonso XIII, was born after his father's death.

Mary Queen of Scots just escaped posthumous birth, her father dying when she was a few days old. Richard Wagner, the composer, was also left fatherless very soon after his birth.

Europe's Rose Gardens.

Though the rose is grown for trade in many parts of Europe, its culture for commercial purposes is now principally monopolized by the vast rose gardens of Grasse in France and of Kasanlik in Bulgaria—the rose gardens of Europe, par excellence—and the manufactures produced from them supply in a great measure the markets of the world. Here acres of roses take the place of corn, vines and orchards of other lands, and some idea of the French trade may be obtained when we learn that the gardens of Grasse, Cannes and the neighboring villages yield nearly 2,650,000 pounds of roses annually; on some days as many as 150 tons of blossoms are picked in the province of the Alpes Maritimes. The beautiful varieties, so much prized by gardeners, are useless for commercial purposes, and the only plant used is the Cabage Provence.

Let Them Down Lightly.

They were strolling players—at least, that's what they called themselves. Their talent was as small as their efforts were great. To add to this, they arrived at the little country town minus their costumes and rather hazy as to their lines. However, the performance took place, albeit it was a "frost" of the worst description. They expected a fearful roasting from the reporter of the paper, and there was a rush the next morning for the local sheet. But, with true hospitality to strangers, the following paragraph appeared: "The company appeared last night at the Town Hall in 'East Lynne.' The ventilation of the theater was perfect, and the orchestra rendered a number of pleasing selections."

Woman's Work in the World.

Dr. George Draper of the Rockefeller Institute, discussing woman's work in the world, said: "And this, mind you, leaves child-bearing out of count. Two women sat one day by a windswept ocean pier. The first woman had three beautiful children, the other was childless. The childless woman, gazing wistfully out over the tumbling blue water, said, 'I'd give ten years of my life to have three such children as yours.' 'Well, three children cost about that,' the other woman answered gravely."—San Francisco Argonaut.

FACTS FEATURES and FANCIES for WOMEN

PARIS.—When a manikin walked through the salons of Callot the other day in an abbreviated Pierrot costume of white satin, the vendeuse said: "It is only for comedy, Madame." This neat little phrase could be applied to so many of the season's clothes!

The comedy frock was made up of a pair of full white charmeuse satin trousers, gathered well above each ankle into a ruffle of wide lace, and the tunic waist was straight, unbelted and finished with a white ruche at the neck. Can you imagine a debutante in it at the first wedding of the autumn?

When the American buyers shouted over it, the vendeuse gave the explanation quoted. "The buyers look so serious and their faces are so puckered, Madame, that we invent a gown to make them laugh." This may explain the reason for a great number of modern Paris gowns, and it is not at all improbable that such an act would appeal immensely to the French sense of humor, writes Anne Rittenhouse in the New York Times. They have a refreshing, if sometimes naughty, childlike delight in daily life, these Parisiennes, and, even though they angle for our money with every bait, they regard us as a nation and as individuals with a good deal of amusement.

Callot tried a "comedy" frock last season that went too far, and she was requested to withdraw it, which she did on the second day, for her sense of humor and the American sense did not harmonize. This year her Pierrot luncheon costume is harmless, if eccentric.

Callot Models in Demand.

Many of our dressmakers are so antagonized they don't want to buy there, but they must, for their smart clientele at home who dress in the extreme fashion demand Callot models.

She accentuated the narrow skirt line at her exhibition more than any one else, and unlike any of her competitors, she failed to drape them voluminously from waist to ankles. The skirts of her walking suits were absolutely plain and extra short, always showing the slash at the side or back or front. She has remained true to this, and now everyone uses it. However, that is not new, for the smartly dressed Americans adopted it for evening gowns last winter.

It makes for grace in a narrow skirt when it is done in moderation, and gives one a chance to show a well-covered foot and ankle, but Callot does not do it in moderation. The word is not in her sartorial dictionary.

Amazing Fashion.

The most amazing fashion she exhibited is to slash an afternoon tailored skirt straight up the back, then lace the edges loosely together with thick cord, the color of the cloth. This opening has no panel beneath it from the knees down. You can imagine the effect.

We won't wear skirts opened to the knees in the back, but watch for that line of drapery going up in the back and the cord lacing. Instead of a seam or a plait. By the way, that ubiquitous plait, loose or stitched, which has been appearing at our backs for two years, has disappeared.

Callot skirts, even the walking ones, were often gathered to the high waist belt at sides and back. The skirts of house gowns were gathered in the front; so are many of the afternoon and evening gowns at other houses.

At this place one saw the first of a new kind of evening gown which looks like nothing so much as a mermaid draped in floating sea weeds, painted by Maxfield Parrish. Satin is the foundation, and streamers of varicolored sequins or metallic gauze are draped loosely over the surface in straight lines caught in only at the knees.

The effect is enchanting, queer as it sounds, but it needs to be done—oh! so very carefully.

Premet is a new sartorial star who has created the sensation of the season at her house on the fashionable Place Vendome, not only by her narrow skirts and transparent drapery from the knee down, but by the mastery she shows over colors.

Sashes Extort Admiration.

She uses much red. Brilliant red; none of your wash tones. American Beauty rose, Jacqueminot and geranium are built into gowns, into wraps and used as sashes. Oh! the sashes! If you could see them all over Paris in every form and variety. Premet makes them play the color scheme. When she cannot do this with one color she uses Indian beadwork on gauze in varicolored stones to give a dash to the gown.

She has one theater gown of American Beauty rose satin with the voluminous skirt drapery turned up here and there with patches of blue satin. The waist is, well, really the regret of a bodice; a negligible quantity, indeed, made of pink tulle.

Artichokes on Gowns.

She introduces many artistic capes in various graceful designs of chiffon in colors. Some of it is gaudily and splendidly interwoven with butterflies

or wheels of metal in several tones; others own their charm to artichokes of satin. By the way, fix your mind on artichokes. The French are using them now as much on their gowns as of fuchsia purple.

These are exceedingly useful adjuncts to a wardrobe that is not at its best. By their use an evening gown can be made presentable for the theater or a restaurant dinner. Tulle and rhinestones, chiffon and metal galloon that has become tattered and torn in the social battle can be covered up by a cape of night blue or geranium red or fuchsia purple.

Last season these coverings were introduced for house wear to give the air of a tea gown to whatever was beneath, and were intended only for five o'clock. None but the yellow rich wanted one, but these new ones appeal especially to the woman whose limited purse compels her to entitle her best gown multum in parvo instead of a pluribus unum.

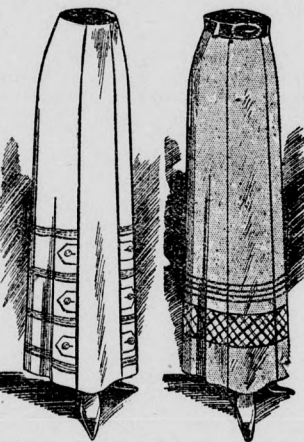

It's difficult for the Americans who are here to talk of anything but the exceeding narrowness of skirts shown at the various houses; but in the last two days the surprise has deepened to consternation because there skirts are actually worn on the street and in the houses.

This looks as though they were really to be accepted.

Conservative women are ordering them for various occasions, and even debutantes are having skirts only 22 inches wide slashed for four inches in the middle of the front.

Smart Skirts.

We show two smart skirts, suitable for serge, shantung, or linen. The first is slightly high-waisted, and fits plainly round the hips; it has a panel taken down front, and is trimmed

from knees downwards by narrow material straps; between these at edge of panel tabs of material are sewn; a button and loop trim each.

Material required: 3 yards 44 inches wide, 1/2 dozen buttons.

The second is a gored skirt, and is trimmed above the hem by a band of plaid silk, or this might be braid or insertion, according to material used for skirt; three rows of braid are sewn above the trimming.

Materials required: 2 1/2 yards 46 inches wide, 4 1/2 yards braid, 1 yard silk 20 inches wide.

When Dining.

The dining room, its decorations and the general arrangement of the table have much to do with the pleasure of dining. The room itself should be light, cheerful and simple. The service at table, even for one's own family, demands an absolutely spotless linen tablecloth. If this cannot be had a polished table with plain, hemstitched doilies should be used. These are cheap and easily laundered. There are fashions in linens as well as in other things, but the laws governing them are flexible enough to satisfy the tastes and purses of people in all walks of life.

If you cannot afford a tablecloth sufficiently heavy to be slightly without starch, use in the last rinsing water a little rice water or a very thin cornstarch—enough to give body without actual stiffness. This rule applies also to napkins. Neither, however, must be stiff.

The cloth should never be laid on a bare table, but over a piece of double width cotton flannel or an old blanket that has been thoroughly cleansed. Let it fall gracefully over the ends of the table.

After the tablecloth is spread place in the center a mat, which may hold a banquet lamp, or candelabra, or a small vase filled with flowers, or a tall vase holding a single rose, or, for everyday use, a small pot of ferns.

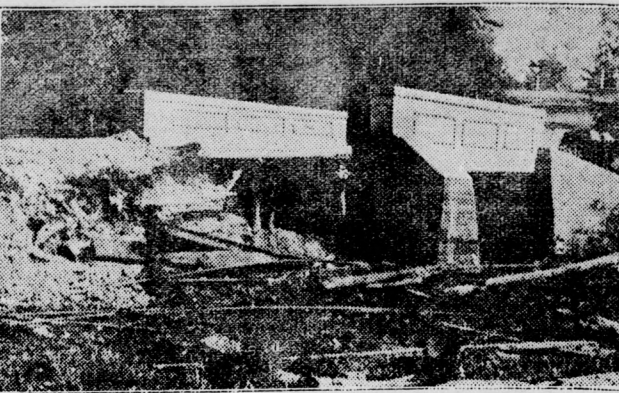

Pompadour Silk Waists.

Among the popular-priced waists which are being taken up by visiting buyers are the flowered taffetas with changeable background, says the Dry Goods Economist. A brown and gold changeable, for instance, has the design brought out in yellow shades with a touch of color, such as green rose or blue, to accentuate the pattern. Blue and black changeables have red green or lavender in the pattern, and other two-toned silks have the bright contrasting tones in the flowered designs which best harmonize with the ground-work of the silk. These waists are made in semitaillor effect with low or high collars, crushed ties, long sleeves and side-front trimmings, usually of fancy buttons. These models wholesale are designed to wear with the early fall suits.

To Prevent Baldness.

Rub vaseline into the scalp every night for at least six months. The hair will stop falling out and new hair will begin to grow.

EXCELLENT TYPE OF CONCRETE BRIDGE

The illustration given above shows a 30-foot reinforced concrete bridge built for \$1,350 in Polk county, Wisconsin, under plans of the highway division.

GOOD ROADS

MODEL ROADS FOR ENGLAND

Bituminous Binding Material Is Pronounced Best After Test—Much Money Appropriated.

Smooth, dustless and durable roads covering the main traffic routes of the United Kingdom are promised for the near future in the road board's first annual report, just issued, says a London dispatch to the Chicago Daily News. The report is given large news and editorial space in the papers today, and the board is warmly praised both for what is promised and for what has been accomplished.

Bituminous binding material is pronounced the best. Water bound roads are condemned as lasting only a little while and as being alternately muddy and dusty while they last. Motor traffic on roads with waterproof binding is said to cause less wear than horse traffic, whereas the exact contrary was true on roads made in the old-fashioned way. The board has obtained the approval of the treasury for a plan to found a national physical laboratory for research work in connection with road materials.

On a five mile stretch of road in Kent twenty kinds of paving material have been laid for experimental purposes. The traffic over this stretch is fast and heavy. Several of the materials, after a few weeks' service, are showing signs of deterioration, while others look as good as when laid.

The board's revenue comes from petrol duties and motor car lines and aggregates £1,000,000 (\$5,000,000) a year. It may advance money to local authorities to build or improve roads, or it may build roads itself. Applications have reached the board from local authorities for more than £8,000,000 (\$40,000,000) for road work. The board pays three-fourths of the cost of work undertaken under the board's auspices. The newspapers declare that the sound and vigorous methods of the board are destined to give the United Kingdom the finest system of highways in the world.

Drouth Causes Death.

Acting Secretary of Agriculture Willet M. Hays gives out results of the department's investigation into the causes of the disease which has proved so fatal to horses in western Kansas.

The trouble is a form of forage poisoning due to drought and to short feed in pastures. The disease is not contagious and no effort to stamp it out will be necessary, as many horses recover when removed from dried pastures to feed lots with abundant supplies of green alfalfa or other green feed.

The department will continue the investigation of the conditions and desires information as to all localities where the disease exists or may put in its appearance.

For Laying Hens.

I have found it a good plan to shut up the flock I have on free range for two or three days. They will then have to lay in the nest boxes, and when let out again will in all probability continue to do so at least for a time, after which they can be shut up as before, says a writer in an exchange. When this plan is followed care should be taken to see that all the weeds are mowed in the poultry yard, as a hen which has stolen her nest may take a notion to lay in the yard instead of the poultry house when shut away from the nest she has selected.

Hoof Rot With Sheep.

Sheep should not be allowed to remain in damp places, especially in winter; and by no means in a damp place at night. Rot and hoof diseases result. However, if a sheep has the rot it is well to cure if possible. A recommended treatment is a mixture of one part of liquid camphor, two parts turpentine, three parts water, giving the sheep a tablespoonful two or three times a day.

BUILDING GOOD ROADS

Many Bills Introduced in Congress for Federal Aid.

Matter May Soon Be Thrashed Out and Happy Medium Found Whereby Government and Various States May Co-operate.

(By HOWARD H. GROSS.)

At every session of congress for the last few years, a half dozen or more bills have been introduced to provide for some kind of co-operation between the federal government and the various states, for the permanent improvement of the highways. These bills are generally limited to those roads used for rural delivery, which comprise about half of all the roads there are, and cover practically all the main thoroughfares. It need scarcely be said that most of these measures are impracticable, visionary and show clearly that the author has given the subject but very little consideration. Others have been quite carefully thought out. These facts collectively show that the subject is knocking at the doors of congress and must sooner or later be considered upon its merits and disposed of.

Like every great question, there is a diversity of opinion, ranging all the way from no federal assistance to the other extreme that "Uncle Sam" should assume the whole burden. When the matter has been fully thrashed out, as it now appears it soon will be, it will be found that somewhere between these extremes a practical, equitable plan will be found, and around this public sentiment will crystallize. Without doubt it will require at least some recognition by and obligation upon the federal government to do something substantial regarding such roads as it uses in its rural mail service.

One of the bills that is attracting considerable attention and is having some support is a plan whereby the federal government will pay an annual rental for such roads as it uses, provided they are kept in good condition, the amount ranging from fifteen to thirty dollars per mile, depending upon the character of the road.

The most significant action, however, that was taken at the recent session of congress was the resolution of Oscar W. Underwood of Alabama, the majority leader of the house, for the appointment of a joint committee of congress to sit during the vacation and to go into the subject very fully to ascertain and determine the duty of the federal government to the highways, and to what extent, if any, and how, if at all, the general government should take up this matter. Mr. Underwood holds that the first thing to do is to ascertain from all the data that can be had exactly what ought to be done, considering all the circumstances and factors that enter into the problem.

This resolution was referred to the committee on rules of the house, and this committee called a public hearing and invited various good roads organizations and individuals to be present and give the committee suggestions upon the propriety, wisdom and scope that should be embraced. The writer was honored with an invitation to address the committee. Altogether perhaps eight or ten representative men were heard from various parts of the country. While there was some diversity of opinion, all agreed that the appointment of the proposed committee was logical and should be regarded as the first step toward the solution of this great problem, and that the committee should give ample time to its consideration and be prepared to report at the opening of congress in December next.

The committee, without leaving their seats, unanimously passed the resolution and ordered it presented to the house for adoption. It was suggested that parties interested would be invited to submit plans and arguments both for and against the proposition with drafts of such bills as the author wished to have considered, to the end that the committee should have before it all the data and details necessary upon which to reach a conclusion. It was suggested that a large part of the physical and scientific data that would naturally be required could be supplied by the road roads bureau of the department of agriculture.

The favorable outcome of this hearing greatly pleased the good roads advocates present, and it really looks as though something definite would be done in the near future.

WOMAN SICK TWELVE YEARS

Wants Other Women to Know
How She Was Finally
Restored to Health.

Louisiana, Mo.:—"I think a woman naturally dislikes to make her troubles known to the public, but complete restoration to health means so much to me that I cannot keep from telling mine for the sake of other suffering women."

"I had been sick about twelve years, and had eleven doctors. I had dragging down pains, pains at monthly periods, bilious spells, and was getting worse all the time. I would hardly get over one spell when I would be sick again. No tongue can tell what I suffered from cramps, and at times I could hardly walk. The doctors said I might die at one of those times, but I took Lydia E. Pinkham's Vegetable Compound and got better right away. Your valuable medicine is worth more than mountains of gold to suffering women."

—Mrs. BERTHA MUFF, 503 N. 4th Street, Louisiana, Mo.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Our letter will be opened, read and answered by a woman and held in strict confidence.

Footstool Church.

Mr. Raymond Unwin told a story relating to the building of St. John's church, South Square, Westminster. The architect, he said, was reputed to have worried Queen Anne about the design. Her majesty at length losing patience kicked her footstool over and remarked in anger: "Build it like that!" The architect fulfilled the royal wishes and the church was built as it stood today—with corners protruding upward like the four legs of a stool.—Reynolds's Newspaper.

An investigation of the Prussian schools shows that an average of 16 per cent of the pupils evade the prescribed physical exercises by physician's certificates or other means.

Roman Heating System.

Like many other Roman houses that have been unearthed in England, one recently brought to light was heated by a system called "hypocaust." The entire basement was one big furnace, from which flues ascended, built into the walls. A wood fire was kept in the basement, the fuel being fed in from an outside annex, through an arch in the wall. The house recently dug out is in a state of excellent preservation.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period. Adv.

In the Wrong Department.

The meek looking man walked up to the book counter. "I want something to keep me at home at night, show me my faults, tell me how to spend my—" "Hold on, old man," said the clerk; "you're in the wrong department. Marriage bureau on the left, three aisles down."

Beware of Undue Intimacy.

VENTRILOQUISM AMONG BIRDS

Many Songsters Have Notes That Are
Difficult to Place—Grasshopper
Is Big Offender.

Ventriloquism is not confined solely to the human race, London Answers asserts. There are many birds whose notes it is almost impossible "to place."

Take the corncrake, with its harsh "crake, crake!" One moment the sound is by your feet; the next, fifty yards away. The grasshopper is another offender in this respect. Its sibilant note is hard to locate.

The sedge warbler goes one better. Not only is it an accomplished ventriloquist, but it will mimic or parody the song of other birds. In a lesser degree the redbreast and the crow possess these powers, and foreign doves come under the same category.

In Brazil the bell bird is exceptionally skillful with its voice, while the American chickadee invariably deceives the listener. Canada boasts of a partridge which is known to deceive sportsmen as to its whereabouts for hours on end.

MOST AMUSING LITTLE TOY

Figures of Two Boxers Swing Back and Forth Under Impact of Blows—Heads Are Separated.

A most amusing toy that can be made by any ingenious boy has been patented by an Illinois man. It consists of a piece of cardboard or thin wood upon which the figures of two boxers swing back and forth under

An Amusing Toy.

the impact of their blows. These blows, by the way, are delivered by the operator's fingers, which are thrust through openings in the shoulders of the figures and have miniature boxing gloves fastened on the tips, converting them into lifelike looking arms. The lower portion of the fighters—from the waist down—is drawn on the card, but their torsos and heads are in separate pieces, pivoted at the waist, so that they swing freely. There is a stop, however, so that if one of the men gets an unusually vigorous punch in the jaw he will only bend back to a certain point and will spring forward again to the fray.

RIDDLES.

What is the longest sentence known to history? Sentence for life.

What is it that you give away all of it and can still keep all of it? Your promise.

Why is Cupid a poor marksman? He is always making Mrs. (misses).

What does Washington, D. C., stand for? Washington, Daddy of His Country.

What is the last thing you take off before going to bed? Your feet from off the floor.

When is a woman not a woman? When she is a little cross.

POODLE DOG LOSES ONE LEG

Victim of Street Car Accident Is Furnished With Artificial Limb by Sympathetic Boy.

A very intelligent white poodle dog which had one of its forelegs cut off in a street car accident wandered out into the country and was adopted by a farm boy. He took the dog to a doctor, who dressed the leg, and when it healed the boy fitted an artificial leg over the stump with a laced glove top and a little rubber pad for the foot. With this leg the dog travels almost as well as ever, but occasionally

Runs With Artificial Leg.

ally, loses his artificial aid to locomotion when looking for woodchucks.

Point in Her Favor.
"A female fly lays 130,000 eggs a season."
"Well, she doesn't cackle, anyhow."

Cough, Cold Sore Throat

Sloan's Liniment gives quick relief for cough, cold, hoarseness, sore throat, croup, asthma, hay fever and bronchitis.

HERE'S PROOF.

Mrs. ALBERT W. PRICE, of Fredonia, Kan., writes: "We use Sloan's Liniment in the family and find it an excellent relief for colds and hay fever attacks. It stops coughing and sneezing almost instantly."

SLOAN'S LINIMENT

RELIEVED SORE THROAT.

Mrs. L. BREWER, of Modello, Fla., writes: "I bought a bottle of your Liniment and it did me all the good in the world. My throat was very sore, and it cured me of my trouble."

GOOD FOR COLD AND CROUP.
Mr. W. H. STRANDBERG, 3721 Elmwood Avenue, Chicago, Ill., writes: "A little boy next door had croup. I gave the mother Sloan's Liniment to try. She gave him three drops on sugar before going to bed, and he got up without the croup in the morning."

Goat Proved Poor Sailor.

While a man temporarily abandoned his skiff along the banks of the Chesapeake river in Pennsylvania the other day a goat jumped into the craft. The animal chewed the shore line. The skiff swung around in the current and was some distance away when the owner returned. The goat ran from stern to prow and back again until one of its hoofs punctured the craft. The skiff quickly filled with water and sank, taking the goat with it. The goat was drowned.

Women's Valuable Thoughts.

Among the first American patents taken out by women were those for a fountain pen, a baby jumper, and the first cook stove. Mrs. Ada Van Pelt of late years invented a permutation lock with three thousand combinations. A woman invented a process of making horseshoes which saved the country \$25,000,000 in fourteen years. Another woman was offered \$20,000 for her paper bag process.

Simple Swimming Apparatus.

A swimming apparatus by means of which a person without any previous knowledge may pass through the water with perfect safety at the rate of sixteen miles an hour has been constructed by a French inventor. The apparatus consists of a plank about six feet long, with floats at each end. It can be folded and easily transported.

Cutting Cowpeas.

Cowpeas may be cut with the mower, and after getting at least a full day's sun the vines are raked up and generally lie another day in the windrow. They are then bunched up in small bunches and after another day or two put up into larger bunches and let stand as long as weather permits, when they are drawn to the barn.

New Industry.

"Now that so many automobiles are passing your house," said the visitor, "I should think you would keep your hens shut up." "What?" said the farmer, "and cut off my greatest income?"—Judge's Library.

"Pacifier" Not Good.

A "pacifier" is the worst thing for a baby to use, as it will strain the muscles of its throat and the lower shape of the mouth and will cause adenoids when the child is older.

For the Hair

Are you so fortunate as to be well satisfied with your hair? Is it long enough, thick enough, rich enough? And your hair does not fall out? Well, well, that is good. But you may know of some not so fortunate. Then just tell them about Ayer's Hair Vigor. They will surely thank you after using it, if not before. Remember, it does not color the hair. Show the list of ingredients to your doctor. Let him decide their value. He knows.

Made by the J. C. AYER CO., Lowell, Mass.

Divided Old Island.
Windmill island occupied a position in the Delaware river between Philadelphia and Camden. A channel that was cut through the island for the passage of ferryboats divided it. One-half was afterward known as Smith's island, the property having been acquired by a family of that name. It was on Smith's island that the resort known as Ridgway Park was located. Both islands were removed by the government for the purpose of deepening the channel in 1894.

Thoughts on Education.

Educated people are often so stupid as to make one doubt whether the poor can gain all by education. But, on the other hand, uneducated people are often so wise that we fear they have something to lose, even if they have nothing to gain, by being educated. In short, the modern methods of political reform, even when they have done well, have not done so obviously well that it is certain to be a benefit to extend them.

HERE IS RELIEF FOR WOMEN

If you have pains in the back, Urinary, Bladder or Kidney trouble, and want a certain, pleasant, herb cure for woman's ills, try Mother Gray's AROMATIZED LEAF. It is safe and never-failing regulator. At druggists or by mail 50 cents. Sample package FREE. Address the Mother Gray Co., Le Roy, N. Y.

Normal Education.

If education were normal, we would find it a wide, free, subtly adjusted system of transference of knowledge wherein each and all could delightedly bring their minds to be fed, life-long; and wherein those most gifted as teachers: i. e., most enjoying the active side of that transference, could delightedly do the feeding.—Gilman.

Satire on Our College Youth.

Three boys from Yale, Princeton and Harvard were in a room when a lady entered (says Life). The Yale boy asked languidly if some fellow ought not to give a chair to the lady; the Princeton boy slowly brought one, and the Harvard boy deliberately sat down in it.

Pity the Poor Fat Person.

A fat French lady despairingly says: "I am so fat that I pray for a disappointment to make me thin, but no sooner does the disappointment come than the joy at the prospect of getting thin makes me fatter than ever."

Pettit's Eye Salve

MAKES SORE EYES WELL

Women's Fineness of Touch.

Electrical engineers number young women among their workers, and Edison is said to prefer women machinists for their fineness of touch. Mrs. Ira Tott of Long Beach, Cal., founded and managed an entire electrical plant successfully. Being an expert engineer, she superintended the building of her plant and bought and installed the machinery.

Preserve Self-Respect.

Being honest is the greater part of achievement. When you know that you're doing the best within you, you can't be downed. Self-respect is an eternal life preserver—no matter how often circumstances wreck you, you're bound to float back to solid ground again.—Exchange.

Not a Good Foot Warmer.

A guest at a hotel in Pomona, Cal., put an electric light bulb in his bed to keep his feet warm. The bulb was smashed while he slept and he awoke to find the bedclothes in flames. He burned himself badly in extinguishing the fire.

Sympathy Not Called For.

Married people get along much better than we think they do, though we don't see how they possibly can.—"Commoners' Rights," by Constance Smedley.

W. L. DOUGLAS SHOES

\$3.00 \$3.50 \$4.00 \$4.50 AND \$5.00

FOR MEN AND WOMEN
Boys wear W. L. Douglas \$2.00, \$2.50 & \$3.00 School Shoes, because one pair will positively outwear two pairs of ordinary shoes, same as the men's shoes.

W. L. Douglas makes and sells more \$3.00, \$3.50 & \$4.00 shoes than any other manufacturer in the world.

THE STANDARD OF QUALITY FOR OVER 30 YEARS.

The workmanship which has made W. L. Douglas shoes famous the world over is maintained in every pair.

Ask your dealer to show you W. L. Douglas latest fashions for fall and winter wear, notice the short vamps which make the foot look smaller, points in a shoe particularly desired by young men. Also the conservative styles which have made W. L. Douglas shoes a household word everywhere.

If you could visit W. L. Douglas large factories at Brockton, Mass., and see for yourself how carefully W. L. Douglas shoes are made, you would then understand why they are warranted to fit better, look better, hold their shape and wear longer than any other make for the price.

CAUTION.—To protect you against inferior shoes, W. L. Douglas stamps his name on the bottom. Look for the stamp. Beware of substitutes. W. L. Douglas shoes are sold in 78 own stores and shoe dealers everywhere. No matter where you live, they are within your reach.

If your dealer cannot supply you, write direct to factory for catalog showing how to order by mail. Shoes sent everywhere, delivery charges prepaid. W. L. Douglas, Brockton, Mass.

TWELVE MOST IMPORTANT MIN- ERALS.

Production Widely Distributed Over
the United States.

The great volume of the mineral production of the United States, its tremendous increase during the last few years, and the wide distribution of the important minerals were indicated in a recent address by George Otis Smith, Director of the United States Geological Survey. The twelve most important mineral products in the United States, in the order of value of annual output, were stated by Mr. Smith to be coal, iron, clay products, copper, petroleum, gold, stone, natural gas, cement, lead, silver, and zinc. "For certain of these minerals," he said "the Geological Survey presents estimates of the supply from which the nation's needs are to be met. For others, especially clay products and cement, the question of the supply of raw material from which they are produced is of little moment compared with that of the availability of the fuels necessary for the processes of manufacture."

"Of nearly equal importance with the factor of abundance of these mineral resources is that of distribution. In the first place, the widespread distribution of the raw material makes possible an industrial nation in which every State has some share in the mineral production. Only four States had a mineral output last year valued at less than \$1,000,000, and ten states had a production valued at over \$50,000,000 each. Again, no State or section appears to have a monopoly of the mineral industry. While Pennsylvania, with its total mineral product more than one-fourth that of the whole country, leads in coal, cement, and stone by large margins, another State, Minnesota, leads in iron ore; another, Arizona, in copper; another, Ohio, in clay products; California in gold; Missouri in both lead and zinc; and Nevada in silver. Furthermore, the centers of production are ever shifting."

"For instance, up to 1894 Pennsylvania was the leading State in the production of petroleum. In 1895 it was succeeded by Ohio. Ohio gave way to California in 1903. California gave way to Oklahoma in 1907 and resumed premiership in 1909, retaining it since that time. Both Illinois and Oklahoma exceeded the production of any of the Eastern States in 1907 and have continued to do so. For many years up to 1906 Montana was the principal producer of copper. In 1907 it gave way to Arizona, and in 1909 Arizona gave place to Montana. In 1910 and 1911 Arizona again held first place. In 1906 Idaho was the chief producer of lead. It gave way to Missouri in 1907, and the latter State now contributes 45 per cent of the country's total. Nevada, in the glory days of the Comstock lode, from 1873 to 1878, was the greatest silver producer in the world. When the Comstock declined, in the latter part of the last century, Nevada gave way as a silver producer, first to Colorado, and then to Montana, but became again the principal producer of silver in 1910. Ten years ago Colorado, the leading gold-producing State, produced over 60 per cent more than California, then second in rank. California's proportion has been steadily increasing for ten years, and in 1911 the largest production of gold was from that State."

Notice to Subscribers

A blue circle around this notice indicates that your subscription has expired and it is the hope of the editor that you will renew for another year. If we do not hear from you at once we will understand that you wish the paper continued. If you should see a blue cross thru this notice, that means that the Post Office forbids us sending the paper any longer without paying an increased rate of postage; therefore this is the last paper you will receive until accounts are squared up. We will be liable to a fine for misuse of the mails if the paper is continued.

Press \$1.00 the Year

Fall In California

ALTHOUGH every season of the year in California brings days and days which are a delight to the human being who is fortunate enough to enjoy them, yet it is in the fall that there is a certain raciness in the air, a touch of an indescribable exhilaration in the physical environment, a keenness in the climate that makes this season superior to any other. Although the time between dawn and twilight is much shorter than in the months that have preceded, still most men and women, we believe, can accomplish more in an autumn day than in any other because the climatic conditions make for greater concentration of mind and strength.

This is especially true after the first rain or two has come to clear the atmosphere of the dirt and gases that have been congregating in it during the dry, dusty summer. Although the showers of yesterday and the preceding evening were not very extensive they served the purpose of clarifying the air and how fine it feels when a full breath is taken into the lungs. What a joyful sensation it brings just to be alive in California in this season of the year when melancholy, according to the poet, is the predominant note in other less favored parts of the world.—Watsonville Register.

A Port For Everybody

THE Journal does not question the wisdom of the move made by the town trustees toward the annexation of Alviso, thereby obtaining a harbor for shipping purposes. It does say, however, that the development of a Port Alviso is too big an undertaking for any individual community and if we expect to realize any great benefit from such a move it must be concentrated effort that will accomplish it. Port Alviso should not be a development of San Jose, Santa Clara, Sunnyvale or any other town single handed, but an effort on the whole of Santa Clara valley to develop a harbor for deep water vessels that will be a benefit to all of the people. The dredging of Alviso harbor is not a work of days, but one that must have its development in the years to come and to that end it must receive no hasty action. Give the scheme mature deliberation.—Santa Clara Journal.

THE war is over, and the smoke has cleared away, revealing a complete victory for the Democrats. The schoolmaster has proved himself too popular for his opponents, and carried the electorate in thirty-nine states, totalling 413 electors to Roosevelt's 106. Taft didn't get a look-in. At this election the Bourbon majority was greatly increased in the National House and that party may control the Senate. With practical working control of the government the Democrats have a great opportunity of redeeming themselves in the eyes of the common people and making good to the utmost. Now is the accepted time and it is the hope and prayer of the common—wealth that the present conditions may be speedily and justly remedied without serious injury to any legitimate business. Prof. Wilson has a world-wide reputation for his insight into economic conditions and on the theory that he would right the existing wrongs the Nation has called him to deliver it out of the hands of the enemy, the big interests.

THERE is no greater work at hand than that undertaken by the Sempervirens Club—an effort to get the State Legislature to vote a sufficient appropriation at its January session to build a road seventeen miles long from the Saratoga summit into the Big Basin, where three-thousand-year-old trees of almost unbelievable size and beauty are to be found. The Club wants the road started by this session of the Legislature, so that it will be finished in time to make the redwood park one of the show places of the State during the Panama-Pacific Exposition.—Santa Clara Journal.

THE "crops" for the season of 1912 have been very satisfactory here on the Pacific Coast. To add to this feeling of complacency comes the report from Washington that never before have the crops for the whole country been so bountiful as this year. Records for production of almost every cereal have been passed, in some instances by millions of bushels. Corn and potatoes have also excelled themselves.

This is as it should be. We are a rapidly growing nation, and if our production of foodstuffs can keep pace with our increase in population we have nothing to fear in the future.—Palo Alto Citizen.

AS Thanksgiving draws near many are daily offering Thanks for the way the "Terrible Turk" is getting it in the neck. This bloody butcher has gone up and down the land in his vicinity slaughtering the innocent and helpless women and children and carrying off young girls. The Balkans are now on his trail and are serving the Turk with a bit of his own tactics. The carving of Turkey is looked for soon and it is certain, in that event, the portions will be well served down to the very Greece.

HERE'S to the votes of women. May their power increase. By their united efforts and votes the women of this state have overwhelmingly defeated that nefarious wolf garbed in sheep's clothing known as the "anti-race-track-gambling bill." Another plume in their bonnet is the fact that equal suffrage has carried in three states, Kansas, Oregon and Arizona, and possibly a fourth, Michigan.

NOW that the fate of the Nation has been settled for the next four years, let us turn our attention to our home and community interests. Let us look to the mental, social and moral interests of our present and future citizens that conditions may grow better instead of worse.

A GIFT WITH A THOUGHT IN IT.

There's one very simple way out of the Christmas shopping problem: don't shop, but sit quietly at home and subscribe for The Youth's Companion. The chances are, too, that no present you could buy for the young friend or the family you delight to honor could confer so much pleasure as this gift of The Youth's Companion for a whole round year—fifty-two weeks' issues, and the fifty-second as keenly anticipated and enjoyed as the very first.

There will be stories for readers of every age; sound advice as to athletics; suggestions for the girl at college or making her own way in the world; good things for every member of the family—all for \$2.00—less than four cents a week.

The one to whom you give the subscription will receive free all the remaining issues of 1912, as well as The Companion Window Transparency and Cal-

endar for 1913, in rich, translucent colors. It is to be hung in the window or over the lampshade. You, too, as giver of the present will receive a copy of it.

Farm Implements

There's nothing needed on the farm that you will not find in our stock. And the implements on our floors are the very best of their kind. We have been serving the farmers and orchardists of this section for a good many years and we know exactly what they want. We've studied their needs and secured the agency for those lines that are best adapted to the requirements of this territory. See us for plows, cultivators, harrows and farm implements of all kinds.

**The Home of Hirsh
Wickwire Suits & Overcoats**

There are men all over this county who come to Pomeroy Bros. regularly for whatever they need in Suits, Overcoats, and Furnishings. And the number of men is growing daily.

Why do they come? Because they like the satisfying assortments we show—they like the invariable good quality that runs throughout the entire stock—they like the sort of courteous helpful service they get here—they like everything about this store because we've studied the needs of men for years and we know just what will please them.

In suits and overcoats we feature the celebrated Hirsh Wickwire line. Fall and winter suits at \$15 to \$40. Overcoats at \$15 to \$40.

Hats, Shirts, Underwear Etc.

We don't overlook the lesser things. This is the only San Jose Store that sells the Strand \$3 Hat. We have plenty of others, too, in various shapes and shades and at various prices. You'll find all the best things in shirts here, and winter underwear, and ties, and socks, and anything else you need.

IN THE SUPERIOR COURT OF THE
COUNTY OF SANTA CLARA, STATE
OF CALIFORNIA

Order to Show Cause Why Order of Sale of Real Estate Should not be Made

In the matter of the estate of Edward Hiatt, deceased.

It appearing to the undersigned, Judge of said Court, by the petition filed and filed by Elwood Hiatt, the administrator of the estate of Edward Hiatt, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of real estate, to pay the expenses and charges of administration of said estate.

It is therefore ordered by the undersigned, Judge of said Court, that all persons interested in the estate of said deceased, appear before the said Superior Court on Friday, the 29th day of November, A. D. 1912, at 10 o'clock in the forenoon of said day, at the Court-room of said Superior Court, at the Court House in San Jose, County of Santa Clara, to show cause why an order should not be granted to the said administrator to sell so much of the real estate of the said deceased as shall be necessary.

And that a copy of this order shall be published at least four successive weeks in The Campbell Interurban Press, a newspaper printed and published in said County.

P. F. GOSBEY
Judge.

Dated October 23, 1912.
L. D. BOHNETT, Attorney for Petitioner.
